

Dear Sir / Mdm,

Re: Successful testing to integrate Infolog Warehouse management system to Realtime Cloud via API

This is to confirm that we had successfully tested the following APIs to integrate Infolog warehouse management system to Realtime Cloud Accounting system

Customer master file - create, update, get all, get by id

Supplier - create, update, get all, get by id

Purchases - create, get all

Sales - create, get all

We shall be taking instruction from our client, Hong Seafood Pte Ltd, to have the system go live.

Thank you for your support.

Regards,

.....
